

What the skin care pros are saying ...

Actual quotes from skin care professionals using SOLURETINOL with clients.

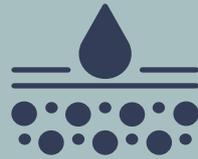

"Many of my clients were complaining with dry skin ...but since using SOLURETINOL with its capability to plump and hydrate ...they are using words like 'moist' and 'supple'....and saying things like, "My skin simply looks younger."

"I have clients coming back in to buy more before they are done with the first kit. That's how I know this is really something different."

"We're always looking for products to enhance skin rejuvenation. SOLURETINOL has the ability to not only stimulate skin to produce more collagen and elastin for long-term effects, but also delivers immediate action in plumping the skin. We can start to see improvement in days. It's the closest thing that we've seen to instant gratification from a topical filler. Our clients love it!"

"I love that the product can be used in addition to any skin care line and enhance any treatment modality. SOLURETINOL is the catalyst to the dramatic change to skin I have been looking for."

"Can't keep this product on the shelf. We have clients buying two at a time. I thought it was because they were afraid of running out, but they are also buying it for their spouse. One lady said this is so easy to use and I see results so quickly that even my husband wants to try it."

Hydrating Glycosaminoglycans Faster

“

We're seeing the effects of hydration with visible plumping in days instead of months.

Leveraging Science to Improve Skin Care

Suspending active ingredients in a matrix of H₂O transports them into the skin faster with no oil-based emulsions.

SOLURETINOL

THE FASTEST-ACTING TRANSDERMAL FILLER ON THE MARKET.

63 YEARS OLD

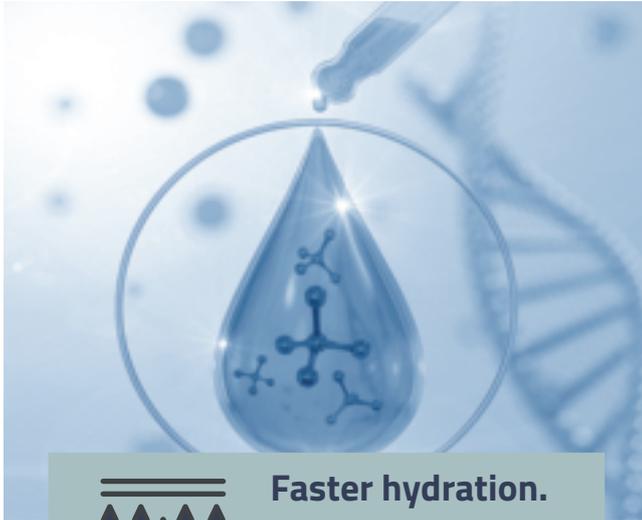

"As a retired physician I was skeptical. I wanted to see results. We saw results."

Carol Carani, M.D.

TIME LAPSE: 20 DAYS

Patents pending engineered nanotechnology that shows noticeable improvement in about three weeks. It takes three months to develop collagen for the same results.

**Faster hydration.
Faster plumping.
Faster filling.**

Breakthrough Innovation in Skin Care Technology

It's All About Those Glycosaminoglycans!

Big word ... but the 'How it Works' is simple.

Glycosaminoglycans fill the space in between collagen tissues. They seek to be hydrated, and when they are hydrated there is a plumping and filling effect that happens much faster than collagen can be developed.

Daytime & Nighttime Serums

Rapid. Accelerated absorption that reduces lines and deep wrinkles.

"It benefits all my clients. New clients with severe wrinkles and aging skin that haven't had treatments or used professional products are getting amazing results. But it's also a game changer for my regular clients with healthy skin. We just add it to their regimen and we're seeing another level of improvement.

We're seeing our best work get better!"

We make molecules small enough to be absorbed by the skin more quickly.

Results. Fast.

"To get a change in 20 days is incredibly significant and unique, and it has to be doing it through hydration."

Steven Shapiro, MD, Dermatology

SOLURETINOL (Nighttime serum) is a retinol product. Retinol was originally developed as an acne treatment.

But a fast and effective topical filler has additional benefits for acne sufferers because it can act as a skin filler. The plumping effect helps fill in scars — a win-win for all acne skin issues.
