What the ReviStim Can Treat?

- Diabetic Neuropathy
- Muscle Pain
- Injuries: Whiplash, Sports, Work Comp
- Sprains/Strains
- Joint Pain
- Fractures: Slow healing, non-union
- Chronic Wounds/ Pressure Ulcers

Nocturnal Feature and Benefit of the ReviStim

- Because it works below sensory, it can be used while sleeping
- P2 mode allows for eight therapy sessions while sleeping

Why At Night?

- This allows for more therapy sessions
- This provides more efficient therapy because the body is more regenerative at night
